Highlights of The Event

Season of AI 2.0: Azure Edition

Season of AI 2.0: Azure Edition is an 8-session hands-on learning program focused on building practical AI solutions using Microsoft Azure. Participants will explore Azure OpenAI, Vision AI, Speech AI, AI Search, and Copilot Studio through guided workshops and real-world projects. The bootcamp emphasizes industry-relevant skills, cloud deployment, and AI-powered application development while also highlighting career and project-based learning. The program concludes with a capstone project and community engagement opportunities.

Azure AI Technologies

Learn Azure OpenAI, Vision AI, Speech AI, Language AI, AI Search, and Copilot Studio.

Hands-On Projects

Build real-world projects across 8 sessions of learning.

Azure for Students Benefits

Access free Azure resources and loads of events.

About MTC

The Microsoft Tech Community (MTC) is a student-led initiative built around the Microsoft Student Ambassadors (MSA) program, designed to bring together learners passionate about technology, innovation, and collaboration. These communities exist at the university or regional level, where ambassadors and core members organize workshops, hackathons, study groups, and hands-on projects to spread knowledge of Microsoft technologies like Azure, AI, and Power Platform.

The MTC provides a supportive environment for students to learn by doing, connect with industry professionals, and collaborate on real-world challenges. By participating, members not only upskill in cutting-edge tech but also build leadership, teamwork, and communication skills, making the community a gateway to both personal growth and career opportunities in the global tech ecosystem.

**By the End of the Bootcamp,
You'll Be Able To:**

- ◆ Build AI-Powered Applications
- ◆ Create RAG Chatbots
- ◆ Work with Azure OpenAI
- ◆ Deploy using AI + Azure
- ◆ Build AI Agents with Copilot Studio
